

- Serial 3 (TX - 14) on the MEGA does to the RXD location on the MarcDuino Master in the BODY if you want to use an additional MarcDuino board to control the body servos

- Serial 1 (TX - 18) on the MEGA goes to the RXD location on the MarcDuino Master in the DOME to control the sounds, lights, and dome panels

- Serial 2 (TX - 16) on the MEGA goes to S1 on the Sabertooth. That then goes to S1 on the Syren (it is a daisy chain to both speed controllers).
